

Colorcon No-Tox® Products Receives USDA Approval for Inkjet Ink for Marking Eggs

Colorcon No-Tox Products is proud to share that we received approval from the United States Department of Agriculture (USDA) for a new white inkjet ink for the marking of shelled eggs! Our new No-Tox Edimark® white ink, IJN-1306, is specifically designed for thermal inkjet printing onto brown eggs. Feel free to contact us for additional information and samples.

About Colorcon No-Tox® Products

Serving the world's non-toxic printing ink needs for over 50 years, Colorcon No-Tox Products is a leading manufacturer of U.S. Food & Drug Administration (FDA) and EU compliant printing inks. Our No-Tox inks and coatings are formulated exclusively for printing applications involving direct and indirect contact with food, pharmaceutical, and medical products, complying with either FDA or EU regulations, or both. All No-Tox FDA and EU compliant inks come with a written compliance guarantee and are manufactured in an ISO 9001:2015 certified, cGMP and FDA registered and audited facility. For more information or to see how we can help you with FDA and EU regulatory compliant printing inks, please contact us at notoxinfo@colorcon.com or at +1-800-724-0624.
